

# Just For Six Years : The Dream Agenda

- by June B. Luna, HoliPolitician -

The Dream Agenda is the Platform of HoliPolitics.

It is entirely new and quite the opposite of current political systems and governance, primarily because the basis of HoliPolitics takes into account the spiritual and not just the physical aspects of governance.

The Dream Agenda is the proposed action plan that an elected President incorporates, practices and implements after he or she takes his or her oath of office.

---

***Free education for the poorest, increased salaries of teachers,  
building of additional schools***

**1.** JFSY, the biggest chunk of the national budget must go to free education of the poorest of the poor, to an increase in salaries and benefits for teachers, and to building additional schools and classrooms.

The number of students per classroom should be limited to thirty-five. Let us encourage and inspire all small, medium, and large companies to adopt schools and classrooms in their respective places of business.

Education must be values-based and virtues-oriented; schools should not be diploma mills. We should create heroes and role

models based on values and character and not on wars, violence, sacrifices, sports, and dollar remittances.

***Free drugs and medicines for all government hospitals  
and health units***

**2.** JFSY, the next biggest chunk of the national budget must be allocated to health and social services. We should revisit and improve further some provisions in the Generics Act of 1988 and review the Cheaper Medicine Act of 2008. It is crucial for the national government to establish a national drug manufacturing plant exclusively for the production of free drugs and medicines required of all government hospitals and health units. Let us increase the salaries and benefits of all health workers and the number of government hospitals, health centers, and lying-in clinics nationwide, and increase the bed capacities of the existing ones. Let us also encourage corporations, companies, civic, and religious organizations to adopt a district hospital, lying-in clinic, or health center in their respective areas of operation. If manufacturing companies are heavily promoting their brands of cigarettes and alcohol in Tri-media, the government should also inform the consuming public through Tri-media about the ill effects of these products, and the taxes collected from these companies should go to the national health budget.

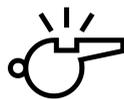

***Value-based education program on philosophy of Karma  
for the government, and full transparency for all  
government contracts***

**3.** JFSY, let us put a stop to graft and corruption at all levels of government, starting from Malacanang Palace down to the smallest government offices through values-based education and virtues-oriented plans and programs. Let us encourage all religious groups to join hands and explain to both government and private employees the biblical law of sow and reap and the deep philosophy of karma. To achieve transparency, all government bids and procurements must be recorded on video or covered by government television. A college student, a religious representative and a member of a respected civic club must always be present during the bidding.

***President as head of BIR, Customs, DPWH, DAR, DENR***

The president, being the Commander-in-Chief of the Armed Forces, shall also act as the appointed head of the Bureau of Internal Revenue and Customs, Department of Public Works and Highways, Department of Agrarian Reforms, and Department of Energy and Natural Resources.

***Stop to gambling, limit entry in all casinos***

Let us also put a stop to all forms of gambling, including the sweepstakes, lotto, horse racing, jueteng, and jai alai. Let us limit the entry in all the casinos to foreigners and rich Filipinos.

### *Budget appropriations done by the President*

4. JFSY, let us put a stop to pork-barrel spending. All budget appropriations and distribution of Internal Revenue allocation must be done by the president alone, prorated based on the current income of each city, town, and municipality.

### *The Policy of 6-4-2 Adopt a Small City*

In the spirit of sharing, this would replace greed with a sense of generosity by implementing a 6-4-2 “Adopt a Small City” program, which means that if rich cities adopt six, four, or two poor cities, we can develop small areas by convincing big-income earners to help the small-income earners.

Priority will be toward the development of agriculture and farm-to-market roads. Since everything belongs to God and we are all merely trustees and stewards of all His earthly resources, the bank secrecy law must be lifted or amended as part of the trustparency campaign.

### *Hold in abeyance interest on foreign debt*

5. JFSY, let us review and hold in abeyance the interest payments of the existing loans to the Philippine Government from all foreign creditors, deposit the amount to the Central Bank, and release the funds to the creditors after six years without penalties.

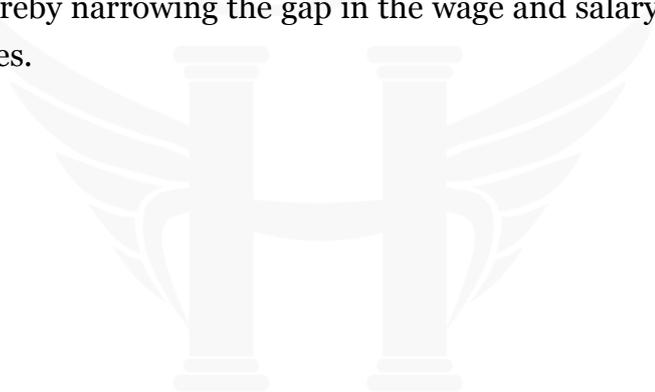

This would give the country a little breathing space to experience how it is to be free from paying interest, which is economically crippling our country.

And no fresh loans shall be availed of for the same period. However, all loan applications in process will be honored subject to thorough review by both government and credible independent agencies. Let us accept with all humility that our country and its people are poor, and let us not pretend otherwise.

### *Narrow the wage gap*

6. JFSY, in the spirit of sharing and trusteeship in business, let us increase the take-home pay of low-wage earners working in both public and private sectors by appealing to top executives, managers, consultants, directors, owners, and investors of corporations as well as government offices and controlled corporations to reduce their allowances, fees, dividends, bonuses, and perks to respectable and acceptable levels and share the savings, thereby narrowing the gap in the wage and salary scales of all employees.

*Appeal to stop to all hostilities, non-violence in all aspects*

7. JFSY, let us promote peace as our common religion. Make a humble and honest appeal to the Moro Islamic Liberation Front, Moro National Liberation Front, New People's Army, and the armed forces of the Philippines to put a stop to all hostilities to experience real peace

Let us also make a similar appeal to all kidnappers, and home and bank robbers, to stop their operations for the same period. Instead of guns and grenades, let us encourage our soldiers to carry brooms and dustpans and ask them to help the nation in maintaining cleanliness. These soldiers certainly would prefer to be with their respective families over risking their lives in battle zones.

Let us give them additional allowances for helping us in cleaning the whole country without losing their integrity and dignity as soldiers while guarding us against misguided elements of our society.

Let us also embrace and practice nonviolence. We should stop watching violent sports, movies, TV programs, and lewd shows and reading sexy magazines.

### *More time for Congress to implement legislation*

**8.** JFSY, Congress should stop or minimize legislation. We already have enough laws in the land. They should focus their time and energy on reviewing and implementing all existing laws in our constitution instead of wasting their limited energies on bickering, infighting, and grandstanding.

Congressmen should spend 80 percent of their time with their constituents in their respective districts and only 20 percent in Batasan. By doing this, it will save the country a lot of taxpayers' money.

### *Disallowing foreign travel under the guise of “aid in legislation”*

They should also not be allowed to travel abroad under the guise of “in aid of legislation” if they use taxpayers' money. This must hold true for the president as well. He or she should set a good example by not traveling abroad during his or her term as president using government funds.

### *Spiritual Recovery Program*

**9.** JFSY, through an SRP, the people, the leaders, and the nation must focus on spirituality and then on the economy. If we will have peace within ourselves, our family, and our country, it will create positive vibrations in the country's atmosphere, thereby attracting peace, happiness, and prosperity and eventually improving the economy.

Blessings are positive energy, and they will only enter in a peaceful and positively charged atmosphere.

### *The top 8 jewels in the country*

**10.** JFSY, as spiritual beings, let us all believe in the innate, natural, eternal goodness of each and every Filipino. In the eyes of God the Father, we are all jewels.

This country needs eight physically blessed, financially fortunate, and intellectually gifted persons who are considered jewels in their respective endeavors. These include the top eight each from (1) spiritual and religious groups, (2) the business sector, (3) the military, (4) education, (5) health, (6) environment, (7) sports and entertainment, and (8) the media.

They will help us in charting the destination of this country, and they will be part of the great history of its recovery and reconciliation.

To make history, to set new standards while learning from the old customs, mores, and traditions, and to change the destination of this very beautiful and blessed country, we need four past presidents in one term to help the incumbent president.

To fulfill His will, God will touch the hearts, minds, and spirits of King Joseph of the Poor, Queen Cory (represented by her daughter Kris) of Spiritual and Social Services, Prince Eddie of Peace, and Princess Gloria of Economy and Prosperity to accept the challenge of their lifetime, and with the guidance of God the Father, they will work as one and help the Emperor-President in making this nation a great, happy, and peaceful place to live during the last remaining twenty-six to thirty five years of their lives—and of the lives of those in this country and of this world.

If there is purity in thoughts, there will be honesty and integrity in words, and if there is honesty and integrity in words, there will surely be royalty in actions, relationships, and connections.

The Filipino people, being the real and true government, must govern this country with utmost royalty through our royal family.

**“We cannot change our destiny,  
but we can definitely change  
our destination.”**
